VACANCY

System Administrator

We are looking for an enthusiastic and motivated IT System Administrator to strengthen our team.

Job description:
The System Administrator is responsible for ensuring the stability, integrity, and efficiency of the organization's IT infrastructure. The role involves protection of critical systems and assets, build solutions, implement new software and hardware, provide training, and assist in developing the overall IT strategy.

Responsibilities:

- Perform server administration tasks (user/group, security permissions, group policies, print services); research event-log warnings and errors; and monitor resources to ensure that systems architecture components work together seamlessly.
- Monitor systems health using existing management tools and respond to hardware issues as they arise; help build, test, and maintain new servers when needed.
- Maintain internal infrastructure requirements, including laptop and desktop computers, servers, routers, switches, firewalls, printers, phones, security updates, support internet, intranet, LANs, WANs, and network segments.
- Assist the help desk and other teams with troubleshooting to identify root cause and provide technical support when needed.
- Perform routine and scheduled audits of all systems, including backups.

Requirements:

- Bachelor's degree in information technology, or a related field.
- 2+ years' experience as a System Administrator or in a similar role.
- Knowlegde an experience with operating sytems such as Windows, Linux en macOS.
- Basisbegrip van netwerken, protocollen en hardwarecomponenten.
- Experience with or knowledge of programming languages and operating systems, current equipment and technologies, enterprise backup and recovery procedures, systems performance-monitoring tools, active directories, virtualization, HTTP traffic, content delivery, and caching.
- Experience in project management and cloud computing.
- Expertise in analyzing and repairing large-scale distributed systems; creating volumes and assigning them to servers; and remote replication.
- Strong communication skills (in Dutch and English) and ability to convey technical information clearly.
- Relevant certifications (e.g., CompTIA A+, Microsoft Certified Systems Administrator) are a plus.
- Flexibility, reliability and integrity.
